

CONTENTS OF VOLUME 20

Number 1

- | | | |
|--|-----|--|
| <i>A. S. Bickel and R. W. Bickel</i> | 1 | Determination of near-optimum use of hospital diagnostic resources using the "GENES" genetic algorithm shell |
| <i>T. W. Blackstad, T. Karagülle and O. P. Ottersen</i> | 15 | MORFOREL, a computer program for two-dimensional analysis of micrographs of biological specimens, with emphasis on immunogold preparations |
| <i>J. M. Ribeiro, D. Juzgado, E. Crespo and A. Sillero</i> | 35 | Computer program for the reservoir model of metabolic crossroads |
| <i>A. H. Bailie, R. H. Mitchell and J. McC. Anderson</i> | 47 | A computer model of re-entry in cardiac tissue |
| <i>N. A. S. Taylor</i> | 55 | Computer integrated measurement of respiratory compliance |
| Software Survey Section | I | MUCIDS |
| | II | IMAGO |
| | II | CHAMP |
| | III | TRANSMUTE |
| | III | Cardiac Output and Alveolar Ventilation |
| | IV | Generalization of the Paired T-Test |
| | IV | CMS - Compartmental Model Simulation |
| | V | XCITE |
| | VI | EEGANAL |

Number 2

- | | | |
|---|----|---|
| <i>R. A. Mustard, A. Cosolo, J. Fisher, T. Pike, B. D. Schouten and H. T. Swanson</i> | 65 | PC-based system for collection and analysis of physiological data |
| <i>R. De Meersman, N. Faroudja, P. Juris, J. Higgins and A. Gentile</i> | 75 | A computerized respiratory sinus arrhythmia program for the non-invasive assessment of parasympathetic activity |
| <i>A. R. Cattani and J. Smith</i> | 95 | Computer control of fast protein liquid chromatography (FPLC) |

<i>R. M. Lewis</i>	103	A computer program to aid in the preparation of reagent solutions
<i>J. G. Sarver and R. L. Fournier</i>	105	Numerical investigation of a novel spiral wound membrane sandwich design for an implantable bioartificial pancreas
<i>J. L. Wisecarver, M. C. Haven and R. S. Markin</i>	121	A macro-driven Lotus 1-2-3™ template for calculating and plotting receiver-operator characteristic curves for clinical laboratory tests
<i>L. P. Brion</i>	129	Use of a Lotus 1-2-3 spreadsheet to plot the confidence and the prediction intervals in linear regression analysis
<i>Jih-Jing Yang, E. Ackerman and S. S. Rich</i>	135	LINKERS: a simulation programming system for generating populations with genetic structure
Announcement	145	ICCC 90
Software Survey Section	I	

Number 3

<i>S. Abboud, G. Barkai, S. Mashiach and D. Sadeh</i>	147	Quantification of the fetal electrocardiogram using averaging technique
<i>Y. Mushu</i>	157	A numerical approach to activated sludge kinetics
<i>G. C. Pogany</i>	175	A QuickBasic computer model of spermatogenesis
<i>M. A. M. Hassan and D. Issac</i>	185	Utilization of a computer-controlled laboratory workstation (Biomek 1000) in routine radioimmunoassay laboratory
<i>P. H. Barry and N. Quartararo</i>	193	PNSROLL, a software package for graphical interactive analysis of single channel patch clamp currents and other binary file records: under mouse control
<i>M.-P. Gustin, C. Cerutti and C. Z. Paultre</i>	205	Heterogeneous computer network for real-time hemodynamic signal processing
Erratum	217	
Software Survey Section	I	

Number 4

<i>P. E. Bourne and W. A. Hendrickson</i>	219	A CPU benchmark for protein crystallographic refinement
<i>R. G. Duggleby</i>	231	A computer program in BASIC for calculating gradients used in chromatography, electrophoresis and centrifugation

<i>J. M. Ribeiro and A. Sillero</i>	235	An algorithm for the computer calculation of the coefficients of a polynomial that allows determination of isoelectric points of proteins and other macromolecules
<i>M. H. Zeini, A. W. Mussa, G. N. Dutton and T. S. Durrani</i>	243	Automatic chart reader—an example of computer systems for patients' data interpretation
<i>J. Jossinet, G. Leftheriotis, F. Vernier and J. L. Saumet</i>	253	A computerized bioelectrical cardiac monitor
<i>A. Varray, J. Mercier and C. Prefaut</i>	261	A BASIC software program to estimate cardiac output and alveolar ventilation
<i>K. W. Hammond, R. J. Prather, V. V. Date and C. A. King</i>	267	A provider-interactive medical record system can favorably influence costs and quality of medical care
<i>A. M. van Ginneken, A. W. M. Smeulders, W. Jansen, J. P. A. Baak and I. Brooymans</i>	281	Design of the diagnostic encyclopedia workstation (DEW)
<i>M. A. Leon</i>	293	Letter to the Editor
<i>J. B. Korten</i>	295	Letter to the Editor and Corrigendum
Software Survey Section	I	

Number 5

<i>C. Cullander, J. R. Baker and T. F. Budinger</i>	297	Rapid detection of spatial pattern by Fourier analysis
<i>M. Fisher</i>	311	Algorithms for the computation of spatial statistics
<i>A. Faure, C. Nemoz and B. Claustrat</i>	319	A graphical and statistical method for investigation of time series in chronobiology according to the cosinor procedure
<i>A. Rao</i>	331	A computer program for the derivation of non-parametric reference ranges from patients' results
<i>J. M. Bland and D. G. Altman</i>	337	A note on the use of the intraclass correlation coefficient in the evaluation of agreement between two methods of measurement
<i>S. Mazzola, F. G. Mazzola and C. Di Marco</i>	341	Organization and management of a database in the respiratory physiology
<i>E. Krusińska and J. Liebhart</i>	351	Robust logistic discriminant functions in diagnosing chronic obstructive airways disease
<i>Ong Lean Suan</i>	361	Computer-aided diagnosis and treatment of malaria: the IMEX system

L. Pellerin

373 A protein assay program for Lotus 1-2-3

Software Survey Section

I

Number 6

*M. A. L. Nicoletis, Chia-Hong Yu
and L. A. Baccala*

379 Structural characterization of the neural circuit responsible for control of cardiovascular functions in higher vertebrates

*J. E. Ames IV, J. E. Strawn and
W. K. Vaughn*

401 Algorithm for the national allocation of hearts and heart-lungs

*J. C. James III, N. S. Gantenberg and
G. R. Hageman*

407 A sample computer system for physiological data acquisition and analysis

P. J. McMillan and J. G. Harris

415 DataVoice™: a microcomputer-based general purpose voice-controlled data-collection system

L. I. Kuncheva

421 Fuzzy multi-level classifier for medical applications

*P. Ferrer Salvans and
L. Alonso Vallès*

433 An epidemiologic approach to computerized medical diagnosis—AEDMI program

*R. Schosser, W. Gross and
K. Messmer*

445 The evaluation of radioactive microsphere data: remarks on the use of the BMDP and SAS statistical software packages

*P. Zuse, R. Hauser, R. Männer,
M. Hausmann and C. Cremer*

465 Real-time multiprocessing of slit scan chromosome profiles

Software Survey Section

I BBAC

II Stenocardia and Hypertonia Diagnostic Program
